

JULIUS GACHUHI

Mobile Platform & DevSecOps Engineer

Cloud Security | CI/CD Automation | SOC 2 Controls | AWS | DevOps
Remote (Open to Worldwide) | Nairobi, Kenya | [Email](#) | [LinkedIn](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Mobile Platform & DevSecOps Engineer with 4+ years of experience building, securing, and operating production-grade mobile and cloud systems. Proven track record implementing AWS security controls aligned with SOC 2 requirements, including IAM policy hardening, encryption standards, monitoring architecture, and vulnerability management. Skilled in cross-platform mobile engineering (Ionic, Angular, Capacitor, Flutter) with deep ownership of CI/CD automation, cloud security, and compliance readiness in high-growth startup environments. Currently transitioning into a dedicated DevOps Engineering role focused on infrastructure reliability and deployment automation.

TECHNICAL SKILLS

Cloud & Infrastructure Security: AWS IAM (Least Privilege, RBAC, IMDSv2) | S3 Security (SSE-KMS, AES-256, Block Public Access, Versioning) | CloudTrail | CloudWatch | AWS Config | GuardDuty | Security Hub | AWS Inspector | WAF & CloudFront | NACLs | SSM Agent

DevSecOps & CI/CD: GitHub Actions | Bitrise | Infrastructure Change Governance | Dependency Scanning (Snyk, OWASP) | Secure Deployment Workflows | Secrets & Configuration Management

Mobile & Application Engineering: Ionic | Angular | Capacitor | Flutter | TypeScript | JavaScript (ES6+) | Dart | OAuth 2.0 | Auth0 SSO | WebSockets | API Security | Secure Coding Practices

PROFESSIONAL EXPERIENCE

Jr. DevOps Engineer | Enquire AI — Remote *January 2026 – Present*

Expanding scope into dedicated DevOps practices, infrastructure reliability, and deployment automation at a high-growth AI startup.

- Supporting infrastructure provisioning, monitoring pipelines, and deployment workflows on AWS.
- Collaborating with engineering teams to improve CI/CD reliability and system observability.
- Applying DevSecOps best practices to continuously improve security posture across cloud infrastructure.

Mobile Platform & DevSecOps Engineer | Enquire AI — Remote *March 2022 – December 2025*

Progressively expanded scope from mobile engineering into AWS cloud security, DevSecOps implementation, and SOC 2-aligned infrastructure controls.

AWS Security & SOC 2 Compliance

- Led implementation of SOC 2-aligned AWS security controls including IAM least privilege policies and role-based access controls across EC2, Lambda, and application services.
- Enabled CloudTrail across all AWS regions, routing encrypted logs to dedicated S3 buckets to support audit and compliance requirements.
- Configured CloudWatch log aggregation for EC2 and application logs with automated alerting for IAM changes and security events.
- Integrated AWS Security Hub and GuardDuty for centralized compliance monitoring and real-time threat detection.
- Enforced IMDSv2 on all EC2 instances and deployed SSM agents for secure, keyless instance management.
- Secured S3 buckets using Block Public Access, SSE-KMS / AES-256 encryption, versioning, lifecycle policies, and access logging.
- Configured AWS WAF with CloudFront including rate limiting and threat mitigation rules.
- Implemented vulnerability management processes using AWS Inspector and dependency scanning tools (Snyk, OWASP).

- Enforced infrastructure change governance by routing all changes exclusively through CI/CD pipelines (GitHub Actions, Bitrise).
- Authored compliance documentation including Access Control Policies, Incident Response Plan, Backup & DR Procedures, Logging & Monitoring Standards, and Secure SDLC Workflows.

Mobile & Platform Engineering

- Led end-to-end development of a cross-platform mobile application (Ionic / Angular + Capacitor), delivered within 6 months.
- Reduced application load time by 1.5 seconds, contributing to a 32% increase in user retention.
- Migrated authentication to Auth0 SSO (OAuth 2.0), strengthening identity security and reducing login friction by 35%.
- Built secure WebSocket-based real-time communication systems supporting high-concurrency production use cases.
- Integrated AI APIs driving a 40% increase in user engagement.
- Modernized legacy mobile architecture, improving codebase maintainability by 60%.

EDUCATION & PROFESSIONAL DEVELOPMENT

- Cybersecurity & Penetration Testing — AfricaHackon
- Full-Stack Software Development — Moringa School
- Angular Fundamentals — Udemy

ADDITIONAL HIGHLIGHTS

- 4+ years operating in fast-scaling startup environments with ownership across mobile, security, and infrastructure domains.
- Strong documentation and cross-functional communication skills; experienced authoring SOC 2 compliance and security policies.
- Familiarity with native mobile lifecycles via Capacitor plugins.
- Open to fully remote roles globally; experienced with async collaboration across time zones.
